Dear Mr. Ye,

this cover letter is prepared in support for the trainee engineering position with Fairfield City Council.

Fairfield City Council prides themselves in being grounded and invested in their clients satisfaction and building partnerships instead of only projects. I am a 4th year civil engineering student and wish to have a successful and meaningful career as a civil engineer. Fairfield City Council is a well known for their projects that connects them with their community such as their upgrades to Bareena Park and Fairfield Heights Park. Further, my research shows that the broader Fairfield City Council has a working environment that encourages and fosters collaboration, teamwork, technical excellence and above all mentoring and coaching. A company that prides themselves on putting out high quality projects while putting the clients first is a clear choice when looking for high quality companies to work for.

My [pursuit for continual growth](#) is evident of the continuing improvement of my university Weighted Average Mark (WAM) throughout course of my degree. Coupled this with my [inquisitiveness](#) evident in my willingness to deepen my skillset by learning computer engineering software such as DRAINS and TUFLOW using my personal time. As a passionate engineering student, I have taken upon myself to learn tools that will help make me become an essential and integral part of a civil engineering team. I am a result driven individual with an aptitude for [team-work](#) whether in University, work or sports where I led my schools basketball team as a captain. I currently work in a retail environment at Target and [customer focus](#) is at the forefront of the services provide. I believe that all of these strengths will be valuable for me to develop my civil engineering skills under the mentorship and coaching of the talented Fairfield City Council team.

While I do believe that I can provide a lot to Fairfield City Council in the medium to long-term, I still need to improve my overall civil engineering skills and knowledge including design, modelling, documentation and client management. As only being an undergraduate I am not as experienced as others. However, I am a quick learner as well as inquisitive by nature. My strengths that mentioned previously above will enable me to develop the areas that I need to improve on and see myself become an asset and an integral part of Fairfield City Council team if given the opportunity.

I hope that I would be provided with the opportunity to work for Fairfield City Council for the trainee engineering position. I look forward for a positive response and should you need any further information please do not hesitate to contact me on 0478827380 or via email at biasonoscar5@gmail.com.

Yours Sincerely,
Oscar Biason
